# How to configure Call Reallocator

It is necessary for Call Reallocator to be configured with the appropriate information regarding the location of various GoldMine® system files.

To achieve this, proceed as follows -
Start Windows Notepad® and open the file named gmcallre.ini as shown below:

```
gmcallre.ini - Notepad
File  Edit  Format  Help

[GoldMine]
SysDir=C:\program files\GoldMine\
CommonDir=C:\program files\GoldMine\Common\
GoldDir=C:\program files\GoldMine\GMBase\
User=John
Password=Smith
SQLUser=SA
SQLPassword=
AllActivityTypes=0

[Licence]
Serial=12345678
Code=87654321
```
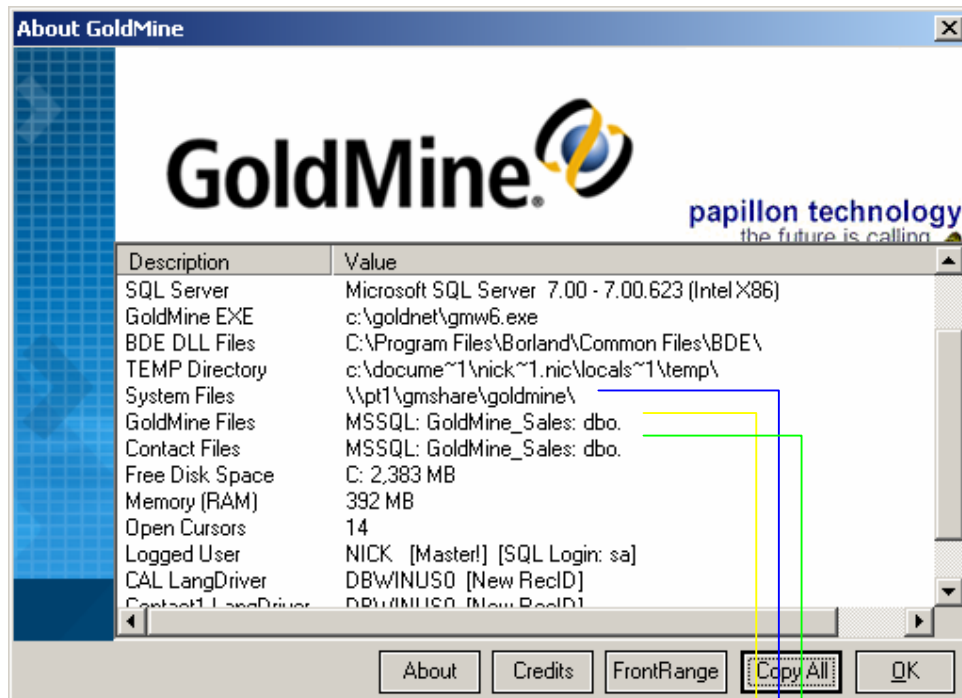

From the menu bar of GoldMine® select **Help | About** to summon this window:

GoldMine®

papillon technology
the future is calling

Corporate Edition with GoldSync®
Version 6.50.31113 November 2003

This product is licensed to:

About   Credits   FrontRange   System   OK

Click on the **System** button.
This will summon the following window:

Copy the precise paths shown in the GoldMine® system window to the respective points in the gmcallre.ini file as shown in the example below:

Ensure that the correct GoldMine® **Username** and **Password** (which must have Master Rights) are also entered in the file. The **Serial Number** and **Activation Key** are obtainable from Papillon Technology. (If you are using SQL Server enter the correct SQL username and password and alter the entry SQL=0 to SQL=1).
Save the file and close Notepad®.
(Please note - the activation key will only function with the licensed copy of GoldMine® for which it was purchased.)
