the future is calling

## See what our customers say

*"Your Tapi Link product is great. My staff really appreciate the benefits of having the caller's information at their fingertips every time the phone rings. Our customers have noticed the improvement in customer service. I have noticed the increase in productivity"*

*"We've been using Tapi Link for six months and I don't know how we ever managed without it."*

## High Performance Computer Telephony for GoldMine®

With Tapi Link you will **already know who is calling** and have all the necessary data to hand before you answer the telephone.

When the telephone rings Tapi Link performs rapid searching on all telephone number fields in your GoldMine® database and screen pops the caller's details, **before** you even answer the phone!

This process is entirely automatic - which means that it doesn't matter whether your contact is calling from their office, their mobile phone, or even their home office.

Tapi Link for GoldMine® - seamlessly integrated.

The screenshot displays the GoldMine software interface. The main window shows a contact record for Jim Warner, including company name (Market Technology), phone numbers, address, and email. A pop-up window titled 'GoldMine® Incoming Call ...' is overlaid on the main window, displaying the caller's details: Market Technology, Jim Warner, CLI: 05771553864, Record Type: Client, Industry: Finance, Interest: Marketing, Acct Mgr: Jim Stephens, and Open: Prime. The pop-up window has buttons for 'Goto', 'Ignore', and 'New Window'.

If their number is listed in a GoldMine® record - Tapi Link will **display the caller's information** on-screen.

This will significantly improve your response times and enhance the levels of service you provide to your clients.

Tapi Link also enables users to **automatically dial** contacts directly from the GoldMine® contact record.

In addition, Tapi Link can automatically display Call Completion dialog boxes and has a vast array of time-saving automation features.

**Tapi Link can deliver client information and pop the GoldMine® record - before you answer the call !**

Designed For GoldMine®

## Frequently Asked Questions

Can Tapi Link automatically display a Complete Call dialog box for all calls ?	Yes

## What telephone hardware do I need in order to use Tapi Link?

In order to take advantage of CTi (Computer Telephony Integration) it is necessary to have either a telephone system or a telephone handset that supports the Microsoft® TAPI standard.

Most modern switchboards support TAPI, however, there are certain exceptions. It is therefore advisable to check for compliancy by contacting Papillon Technology.

If you have any questions regarding CTi or require any further information please contact Papillon Technology by telephone on US +1 (408)-960-1032, internationally on +44 (0)1992 560487 or by email to sales@camrivox.com.
